Summary

I'm Mustapha Adegbite, a Frontend Developer who turns ideas into fast, interactive, and visually striking web experiences. With a strong command of React, modern JavaScript (ES6+), and Tailwind CSS, I build responsive, high-performing applications that seamlessly combine clean, maintainable code with thoughtful, user-centered design. I am passionate about creating interfaces that not only look great but also provide intuitive, enjoyable experiences for every user. Driven by curiosity and a desire to solve real-world problems, I thrive on transforming creative concepts into polished, functional digital solutions. Whether it's integrating APIs, managing state efficiently, or ensuring accessibility and performance across devices, I approach every project with precision, care, and a commitment to quality. I am constantly learning, experimenting with new tools, and improving my skills to stay at the forefront of frontend development. My goal is to deliver projects that not only impress users but also make a tangible impact for teams and businesses, blending creativity, functionality, and efficiency in every build. Collaborative, detail-oriented, and highly motivated, I bring energy, innovation, and dedication to every project I take on, ensuring that each experience I create is both meaningful and memorable.

Technical Skills

Programming	Tools	Soft Skills
HTML	GIT	Problem Solving
CSS	GitHub	Communication
JavaScript	Photoshop	Teamwork
TypeScript	Tailwind CSS	Leadership
React.js	Bootstrap	Creativity
Next.js		

Experience

Frontend Developer Intern — Creative Digital Tech (CDT)

Jan 2024 – Jun 2024

- Collaborated on building and improving web interfaces using React and Tailwind CSS.

- Implemented responsive designs and optimized user interactions across multiple projects.

- Worked with a small dev team, learning real-world workflows and Git collaboration.

Frontend Development Intern — Code Alpha

Sept 2025 – Oct 2025

- Gained practical experience in React and UI development through task-based internship.

- Built mini projects focusing on clean code, interactivity, and component-based structure.

Notable Projects

Habit XP

A web app that helps users build and maintain daily habits by tracking progress visually. Built with React and modern JavaScript, featuring a clean, responsive UI and intuitive interactions.

Stacks: React.js + Zustand + Tailwind CSS

Invoice Generator App

A tool that allows users to quickly create, customize, and download professional invoices, saving time and reducing errors in manual billing.

Stacks: React.js + jspdf + Tailwind CSS

Word Connect Game

An interactive game that helps users improve their spelling and vocabulary through fun, engaging challenges with immediate feedback.

Stacks: React.js + framer motion + Tailwind CSS

Ticket Management App

Streamlines the process of creating, tracking, and resolving tickets, helping teams stay organized, prioritize tasks efficiently, and ensure no issue goes unresolved.

Stacks: React.js + Zustand + formik + Convex + Tailwind CSS
